

THE EYE BEHIND THE WALL

Plot:

The film has a story quite similar to the anime "Attack on Titan".

The story and the concept is quite intriguing but the film lacks so many sci-fi elements that the audience would expect to watch.

There could have been more glitches, creatures, man in black, spaceships, futuristic objects.

Because the film looks quite big budget to be able to indulge the elements in the film.

The film gradually opens to the actual plot and the mystery in the film.

The film contains too much nudity and sexual content.

One there is the couple's intimate nude scenes and then there is a part where the female lead has to make a nude video with the stranger to cross the border in the film which is shown clearly as well.

Cinematography:

The film is directed fantabulously. Though the film looks long and stretchy it is clearly understood and every plot is explained.

Dialogues:

The conversations between the characters are quite precise and unnecessarily elaborate.

Pace:

The pace of the film is quite slow and it lacks so many scenes that are not edited out but are unnecessary.

VFX, Sound & Lights:

Nothing sort of VFX is used much. The ones used were something that could be done by a kid too.

The sound effects are good but more was expected.

The lights are perfectly used to enhance or add a gloomy effect in the film.

The colour grading of the film is good too.

All in all the film could have been better. I expected a little more. As the film ended on a cliff without a hanger.

Suggestion:

The film as a Sci-fi is good to watch but there is a bit too much nudity and the pace is a little slow.

"Consider"
